

Automatically back up your
business in the cloud.

888.810.7706
iCoreConnect.com

Why back up to iCoreCloud?

It's the easiest way to achieve peace of mind:

- The “cloud” refers to off-site data centers. iCoreConnect’s first-class data centers are protected by massive, redundant power sources, and big guys with guns
- Set up any or all computers in your business to automatically upload data, creating virtual “mirrors”
- If you suffer a data loss, we can send your mirrored data back to you, even if it needs to be placed on a new computer or server

Don't let theft, fire, flood & ransomware take down your practice. **iCoreCloud now gives you the tools to limit your downtime and exposure.**

Add Full HIPAA Protection

Medical and dental practices, hospitals and other healthcare businesses can opt for our fully HIPAA-certified backup.
