

ePrescribe all meds *faster*
from any device.

Cloud-based ePrescribing from iCoreConnect

ePrescribe from any computer or device,
even if you're not at your office.

- Integrate with your Practice Management software, reducing time and manual entry errors
- Only one subscription per provider is needed to practice at multiple locations*
- View all the patient's prescriptions, from all pharmacies, over the past twelve months
- Reference the integrated, always up-to-date Lexicomp® drug directory
- Save "Doctor's Favorites" for commonly-used medication sets

**(If you have two DEA #s, you will need a second subscription)*

Powerful Add-On Modules

Controlled Substances - Add the ability to Electronically Prescribe Controlled Substances (EPCS)

PMP/PDMP - Add the ability to directly access your state's Prescription Drug Monitoring database in real time inside iCoreRx to fulfill PMP laws (varies by state)
